# How can I monitor all Tiers?

## 🎯 All sizes

Tiers from all sizes? How would a bankruptcy or a payment default impact me? Small firms often have poor or limited data.

## 🎯 Heterogenous Sources

Companies web sites, news, social media, user reviews, e-commerce platforms, professional market places, research, private sources, pictures...

## 🎯 Language barrier

Tiers can come from different countries, speak various languages (Chinese, Korean, Japanese ...)

## 🎯 Business Taxonomy

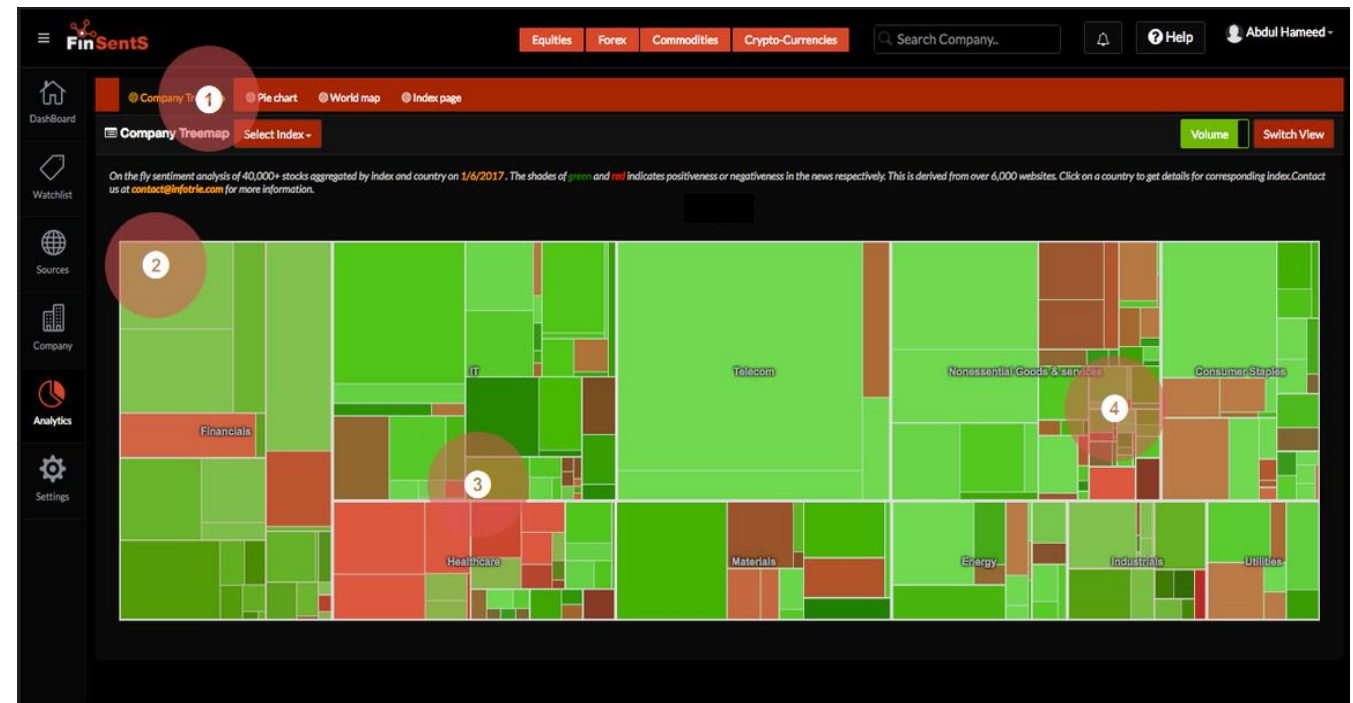

Do I really understand the business done by tiers, what service or product they sell?

# FinSentS - Financial News and Sentiment Screener

Unstructured and Alternative Data Discovery Portal

- 360° real-time monitoring of your tiers
- Detect weak signals, enhance your credit monitoring
- Investigate the health of specific tiers, compare to peers.

# How Does This Work?

## Unlimited Data sources

## Kyriba Apps & APIs

**200,000+ Entities** monitored, add your own

**15+ Years of multi-lingual Data**

**Business Taxonomy:** Industry, Products, ESG, crisis, natural events ...

**Advanced AI & NLP**

**Smart Alerts**

**Labs & custom predictive analytics**

**Analytics Tool box**

## iFeed API
