

How does your voice sound?

At **Acapela Group**, we create personalized digital voices that match your voice branding. Our voices, based on NeuralTTS and AI, bring persona to the user experience.

Acapela is the European leader of voice solutions with thirty years of expertise and market feedback, strong partnerships, deep rooted R&D, an enthusiastic team and a strong appetite for innovation. Your voice matters. And Acapela cares about it. The company aims to create voices that sound different: custom voices, children voices, voice banking with my-own-voice. Voices adapted to the needs and context of application, based on promising results on NeuralTTS.

Your voice matters!

PERSONALIZED DIGITAL VOICE EXPERIENCE

Voice-First is changing the way we engage with devices. That's why Acapela Group creates personalized voices. Our solutions speech-empower all services, apps or devices that need to speak. The company offers a large portfolio of standard voices and creates custom voices for the exclusive use of a company, a brand or a device.

OUR MISSION Help our customers to create their voice personas and develop their voice branding through personalized digital voices

- Leading European Voice Technology expert
- 30+ years of experience
- Led by innovation
- An international team of experts
- Organization fully dedicated to voice solutions
- In-house technologies
- VOICE AI: Neural TTS
- Involved in many R&D funded projects
- 30+ languages
- 120+ standard voices in the portfolio

MARKETS - All services, apps or devices that need to speak.

We speech-enable a vast array of installations, devices, vehicles, corporate messages, personal aids, learning functions, games, and much more.

FROM SPECIFIC DOMAIN-BASED APPLICATIONS TO CUSTOM VOICES

Whether you need to deliver specific messages with the highest quality level based on parameters or produce audio input in real time from text, we will help you identify the best solution adapted to your needs. You can use a standard voice from our catalogue or a custom voice tailored to meet your specific requirements.

Our expertise, our in-house technologies and our latest work on Deep Learning and Artificial Intelligence ensure we can rapidly create voices for our customers, adapted to their specific requirements.

Acapela voices are currently being used by a wide range of companies all over the world, from SMEs to large international groups, delivering a unique identity that fits their brands. Acapela Transport and Acapela Inclusive business units were created to focus on industry-specific needs.

CUSTOM VOICES: ACAPELA VOICE FACTORY

The Acapela Voice Factory is Acapela's solution for custom voice creation. It enables companies to perform their voice branding through any audio touch point with a very natural and pleasant digital voice. Custom voices add an audio brand identity, offer outstanding conversational user experience and increase customer satisfaction and confidence.

Acapela Voice Factory custom voices are the result of in-depth research into recording, processing and fine-tuning methods used in the text to voice production process. Using expertise and industry insight, the Acapela Voice Factory has been designed to develop natural, high quality exclusive voices.

INNOVATION: ACAPELA DNN

DNN (Deep Neural Networks) have revolutionized artificial vision and automatic speech recognition. This Machine Learning revolution is keeping its promises as it enters the digital voice arena. Acapela Group is actively working voice, opening a new era for voice creation and its uses. Acapela's latest work on Neural TTS Machine Learning enable us to rapidly create voices adapted to the specific requirements of a company, a brand or a device.
