GAS MANAGEMENT SOLUTIONS

HIGH PRESSURE MOBILE RECHARGEABLE

TIRE PRESSURE ADJUSTMENT

BimPAIR Presentation

2

➔ *Specialized in the development of high-pressure management solutions in nomadic and rechargeable way, we meet the needs of autonomy and mobility in the use of gases (air, nitrogen, CO2, etc.) in the pneumatic and industrial fields.*

We rely on a disruptive technological innovation developed and protected by two patents at the international level and a business expertise that allows us to meet the specific needs of our customers.

Big names are already working with us : Michelin, Airbus, Saint Gobain, for various applications of our solutions : pressure adjustment, leak detection, tool energy, inert or spraying.

We have a catalog of industrialized products, the ability to develop tailor-made solutions and logistics facilities for refills.

THE PERFECT SOLUTION
FOR TIRE PRESSURE MONITORING!

CO2

➡ The Concept :

Use of Bimpair Capsules containing interchangeable and rechargeable 88g CO2 cartridges. Quick and precise tire pressure adjustment.

1 Loaded capsule contains the equivalent of 42L : 1.490 bars on one tire or the possibility to increase the pressure by 0.375g per tire on the 4 tires (standard : 205x55x16).

The Cartridges once used are sent back to Bimpair for refill.
