INTRODUCING  
Korean Mobility  
Startups

# Nota Inc.

<https://nota.ai/en/index.php>

**Production/Solution**  
On-device AI, ITS Solution

**Established Year :**  
2015

**Employee Number :**  
53

**Europe market experience :**  
Yes

**About Us (Team)**  
Myungsu Chae (CEO)  
Eddie Yang (CBO)  
Taeho Kim (CTO)  
Steven Kim (CSO)

**Contact Info.**  
Haejin Lee  
(Global business manager)  
[haejin.lee@nota.ai](mailto:haejin.lee@nota.ai)

Nota made an innovative move on the development of deep learning model compression technology. NetsPresso, our automatic model compression platform, can make AI smaller, faster, and energy- efficient, eventually allowing it to run independently on small edge devices

## Product Description

### 1. NetsPresso: model compression platform

NetsPresso is an automated AI model compression platform solution designed for deploying lightweight DL models on different platforms and architectures from cloud applications to edge devices. It delivers cost-Effective vision-based AI solutions for facial recognition and ITS.

### 2. Facial recognition solution

Nota's facial recognition solution for the mobility industry protects drivers from severe accidents through driver monitoring and customizing the settings.

- Driver Authentication: Authorization for driving or Automatic adjustment (seat, mirror angle, steering wheel position, etc.)

Drowsiness / distraction detection gives an automatic alarm to drivers (Indicators: eyelid, gaze, head position/rotation, yawning)

### 3. ITS: Intelligent Traffic monitoring system

we provide intelligent traffic monitoring system that understands traffic situation at intersections with a cheap low-end hardware. Through the analysis of the traffic data, our solution can give informative support((emergency) vehicle detection, Emergency vehicle detection, Pedestrian Detection) to improve the circulation of traffic loads.

# bitsensing Inc.

<https://bitsensing.com/>

**Production/Solution**  
Rader technology

**Established Year :**  
2018

**Employee Number :**  
55

**About Us (Team)**  
Jae-eun Lee (CEO),  
Joonsoo Ryu (COO & CFO)  
Haeseung Lim (CTO)

**Contact Info.**  
Joonsoo Ryu (COO & CFO)  
[joonsoo@bitsensing.com](mailto:joonsoo@bitsensing.com)

bitsensing is an imaging radar technology company committed to building safer smart cities and elevating connected living. By designing cutting-edge sensor fusions and AI solutions, we are bringing an unprecedented level of intelligence to smart living.

## Product Description

**AIR Traffic:** 24GHz ITS IoT Radar (CES2020 Awardee)  
**mini radar series:** 60GHz high resolution radar for various industries, including: 1) wellness, 2) in-cabin, and 3) robotics  
**Aftermarket ADAS radar:** 77GHz automotive radar for  
**ADAS AIR 4D:** 79GHz imaging radar for autonomous driving

## Company Highlights

**2018:** Seed round investment / Selected for TIPS (Tech Incubator Program for Startup)

**2019:** ISO and KC certified / Bridge round investment / CES2020 Smart City Innovation Awardee / Awards (Ministry of Land, Infra and Transportation, Ministry of Science)

**2020:** Selected for cooperation programs with leading firms (Hyundai Motor ZeroOne, SK Telecom True Innovation, Samsung Electronics C-Lab outside) / Pre-A round investment

**CE certification:** 24GHz AIR Traffic (completed), 60GHz mini series (in progress) - Area of interest: Investors relations, Distribution partnership, POC opportunities

# BIGS Spring Tree

<http://eng.bigsspringtree.com>

**Production/Solution**  
VR,AR-based Online  
Maintenance Platform

**Established Year :**  
2016

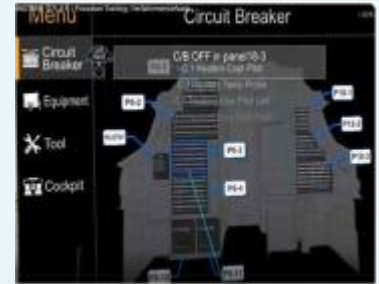

**Employee Number :**  
11

**About Us (Team)**  
Jung Ho Seo (CEO)  
Hyun Ook Kim(General  
Manager)

**Contact Info.**  
Hyun Ook Kim(General  
Manager)  
[big\\_s\\_kho@bigsspringtree.com](mailto:big_s_kho@bigsspringtree.com)

An engineering company which provides maintenance support simulation solution platform with VR/AR technology. Most of team members are mechanics and engineers who have more than 10 years of career from shipbuilding and aviation fields.

## Product Description

ROP(Repair Online Platform) is a maintenance platform with VR/AR simulation solution. It makes it possible to reduce education and training cost for the mechanics of manufacturing companies from aviation and shipbuilding fields where high risk and high technology is required. Not only because of the cost benefits but we also provide far better maintenance support system solution with AR/VR technology. This platform can be integrated to ERP which allows users get the systemic support to the entire operation process.

## Company Highlights

### 2021

Export Case – Hungarian Geology Institute ‘GEOCHEM’

### 2020

Germany, Hungary MOU 2 cases, NDA 1 case

### 2018

ISO 9001 and Gartner Vender Briefing

**Willing to cooperate in R&D project or technology cooperation**

# Eccov Inc.

<https://www.eccov.co.kr/>

## Production/Solution

Module Platform  
Architecture for E-Bike and  
E-Motorcycles

**Established Year :**  
2019

**Employee Number :**  
7

**About Us (Team)**  
Sundae Lim (CEO)

**Contact Info.**  
Sundae Lim (CEO)  
[sundae@eccov.com](mailto:sundae@eccov.com)

Eccov is a startup that started as Hyundai Motor Group's in-house venture and spun off in 2019. The main development item, EMPA (Eccov Modular Platform Architecture), is an item that encompasses the body structure of electric bicycles and electric motorcycles based on the automobile production process. Eccov has its own manufacturing process, which is rare in the startup sector.

## Product Description

Three-wheel electric cargo bicycle equipped with a Mando chainless drive system designed based on a frame from the EMPA technology.

## Company Highlights

### 2019

- CES 2019 / Spun-off from Hyundai Motor Group

### 2020

- Prospective Design-Driven Company / Global Premium Living Goods by KIDP\*

\* Korea Institute of Design Promotion

- IFA 2020 Startup
- COMEUP 2020 by Ministry of SMEs and Startups
- 2020 Design Driven Innovation 50 by KIDP

### 2021

- KIBO(Korea Technology Finance Corporation) Pre-Series A investment
- Preparing to obtain CE Mark

# yellowknife Inc.

<https://yellowknife.io/?lang=en>

## Production/Solution

UIUX service for intelligent mobility experience

## Established Year :

2010

## Employee Number :

10

## About Us (Team)

Hansung Lee (CEO)

Youngjin Jang (CMO/CDO)

Gyunghwan Bae (R&D Director)

## Contact Info.

Youngjin Jang (CMO/CDO)

[yjiang@yellowknife.io](mailto:yjiang@yellowknife.io)

yellowknife is a Korean startup which is producing UIUX services for mobility: Veloga Cycle and Veloga Auto. We are a spin-off company from Hyundai Motor Group, this team started since 2018 and founded as company on 2020

## Product Description

Veloga Auto changes the driving screen as drivers want, in functional and emotional. As the in-vehicle space is change into movable life space, the displays in cars will be more important than the past. Veloga Cycle offers rider screens on riders' phones, so they can enjoy their riding with new experience.

## Company Highlights

**2018.04** Team selected as a pre-startup of Hyundai Motor Group

**2020.01** Exhibition on CES 2020 as "AURORA Platform"

**2020.01** Honoree on CES 2020 Innovation Awards (with Motrex)

**2020.07** Certified as T-5, from KIBO

**2020.09** Launched Veloga Cycle service (Android)

**2021.01** Exhibition on CES 2021 as "Veloga Auto / Veloga Cycle"

**2021.01** Founded R&D Center

**2021.03** Agreed on MOU with MeekyungTech

# StradVision Inc.

<https://stradvision.com/>

## Production/Solution

AI-based vision processing for Advanced Driver Assistance Systems(ADAS)

## Established Year :

2014

## Employee Number :

176

## Europe market experience :

YES

## About Us (Team)

Junhwan Kim (CEO)  
Hyungtae Kim (CFO)  
Sunny Lee (COO)

## Contact Info.

Sunny Lee (COO)  
[sunny.lee@stradvision.com](mailto:sunny.lee@stradvision.com)

Founded in 2014, StradVision is an automotive industry pioneer in AI-based vision processing technology for Advanced Driver Assistance Systems (ADAS). The company is accelerating the advent of fully autonomous vehicles by making ADAS features available at a fraction of the market cost compared with competitors. StradVision's software is being deployed in 8.8 million vehicles worldwide and is serviced by their over 170 employees in Seoul, San Jose, Tokyo, and Munich.

## Product Description

StradVision's SVNet is a hardware-optimized software for ADAS that allows vehicles to detect and identify objects accurately, such as other vehicles, lanes, pedestrians, animals, free space, traffic signs, and lights, even in harsh weather conditions or poor lighting. To achieve surround vision, SVNet's camera and deep learning-based capabilities work seamlessly with other sensors such as LiDAR and RADAR to process collected road data with high speed and accuracy. The software also enables ADAS features such as Adaptive Cruise Control, Lane Keeping Assist, Forward Collision Warning, Automatic Parking Assist to be more precise and reliable than other solutions on the market.

## Company Highlights

- 2017. Attract outside Seed – Hyundai Motor, etc.
- 2017. Pre-A round – LG Electronics, etc.
- 2018. Start Top Tier1 project
- 2018. Attract Series A: Hyundai Motor, Hyundai Mobis, Global Brain, Hanhwa Investment, etc.
- 2019. Attract Series B
- 2019. 2020 AVT ACES Award winner- Autonomy software
- 2020. Established German office, Invited Startup Autobahn Selection Day by Daimler Group
- 2020. Selected Top Transportation Solution Provider 2020
- 2020. ISO 9001 certified
- 2020. NVIDIA Inception Premier Partner / Renesas R-Car Proactive Partner
- 2020. Appointed new Head of Sales in Japan, AutoSens Brussel  
- Product of the Year shortlisted
- 2020. Selected the best new industry company and won Minister's Award by Korean Ministry of SMEs and Startups

# Geo-Line

[http://geo-line.com/en/home\\_en-2/](http://geo-line.com/en/home_en-2/)

## Production/Solution

PLUG & PAY Electric Vehicle Mobile Charging-Payment Service

## Established Year :

2014

## Employee Number :

5

## Europe market

experience :

YES

## About Us (Team)

Sunggyoo Geo (CEO)

Hyeoksoo LEE (CSO)

## Contact Info.

Sunggyoo Geo (CEO)

[sunggyoo.geo@geo-line.com](mailto:sunggyoo.geo@geo-line.com)

Geo-Line invented 'PLUG & PAY Electric Vehicle Mobile Charging-Payment Service' based on the mission of sharing electricity for the sustainable earth, resolving conflict of residents due to parking problem and unauthorized use of electricity. Customers can use it conveniently without specifying parking area for electric vehicle.

## Product Description

### Itimate EV charging innovator

-98% off @Installation Cost

- 100% off @Running Cost

- Automatic Payment in AC charging

## Company Highlights

### CE marking in progress

(estimated within 4<sup>th</sup> quater 2021)

Hyundai Motors Fund, KOSMES CB

The only invitee to COP21 @PARIS among EV charging industry(and 7 more around world)

Charging system supplying to Utilities

# Conception. Co., Ltd.

<http://www.conception.co.kr/>

Leading company  
in the 4th Industrial Revolution in 3D Printing

**Production/Solution**  
3D Printing Technology for  
Lightweight Battery Pack

**Established Year :**  
2017

**Employee Number :**  
12

**About Us (Team)**  
Jung Goo Sang (CEO)

**Contact Info.**  
Oh, Ju-Ae  
(Senior Researcher )  
[jaoh@conception.co.kr](mailto:jaoh@conception.co.kr)

## Product Description

<Binder Jet 3DP>

<Metal 3DP>

<Architectural 3DP>

<UV Resin 3DP>

## Company Highlights

### 2017

Establishment of a corporate research institute  
ISO TC 261 3D Printing International Standards.

### 2019

Minister of SMEs and Startups Awarded

ISO9001 certification

Award for Director of KIAT

### 2020

Awarded a citation from the Korean Intellectual Property

IP Management certification

Inno-Biz certification

### 2021

Outstanding Technology Company(T-3) certification

**Production/Solution**  
Future Clean Fuels(H2 Hybrid) Energy Station

**Established Year :**  
1966

**Employee Number :**  
1565

**About Us (Team)**  
Seok Jin, Yoon (CEO)  
Ku In, Kang (CFO)  
Hwan, Lim (Managing Director)

**Contact Info.**  
Moon, Dong-ju  
(Principal Researcher )  
[djmoon@kist.re.kr](mailto:djmoon@kist.re.kr)

Since its establishment in 1966 as Korea's first government funded R&D institute, KIST has played a key role in providing a solid foundation for S&T-based national development strategies and supplying advanced technologies to Korean industries.

## Product Description

Future Clean Fuels-H2 Hybrid Energy Station is based on LNG, clean fuels(GTL)\* and Hydrogen. Hydrogen can be also produced by water electrolysis using surplus electricity for carbon neutralization. \* Clean fuels can be produced from natural gas, biogas, associated gas and CO2 neutralization.

## Company Highlights

### KIST Promotion Technology

1. GTL-EPISO Process  
: Commercialization after Demonstration(1bdp) at Vietnam offshore
2. Small-Scale GLT Technology Process with Carbon Neutralization
3. LNG-Hydrogen Station  
: Compact Reformer & Hydrogen Station
4. e-Clean Fuels-H2 station

What is a Future Clean Fuels-H<sub>2</sub> Hybrid Energy Station?

KIST Shoking GTL System

Design & Demonstration of GTL-EPISO Process

KIST LNG-H<sub>2</sub> Station Business Model
