

Presentation of ECOSYS Group

Our core business

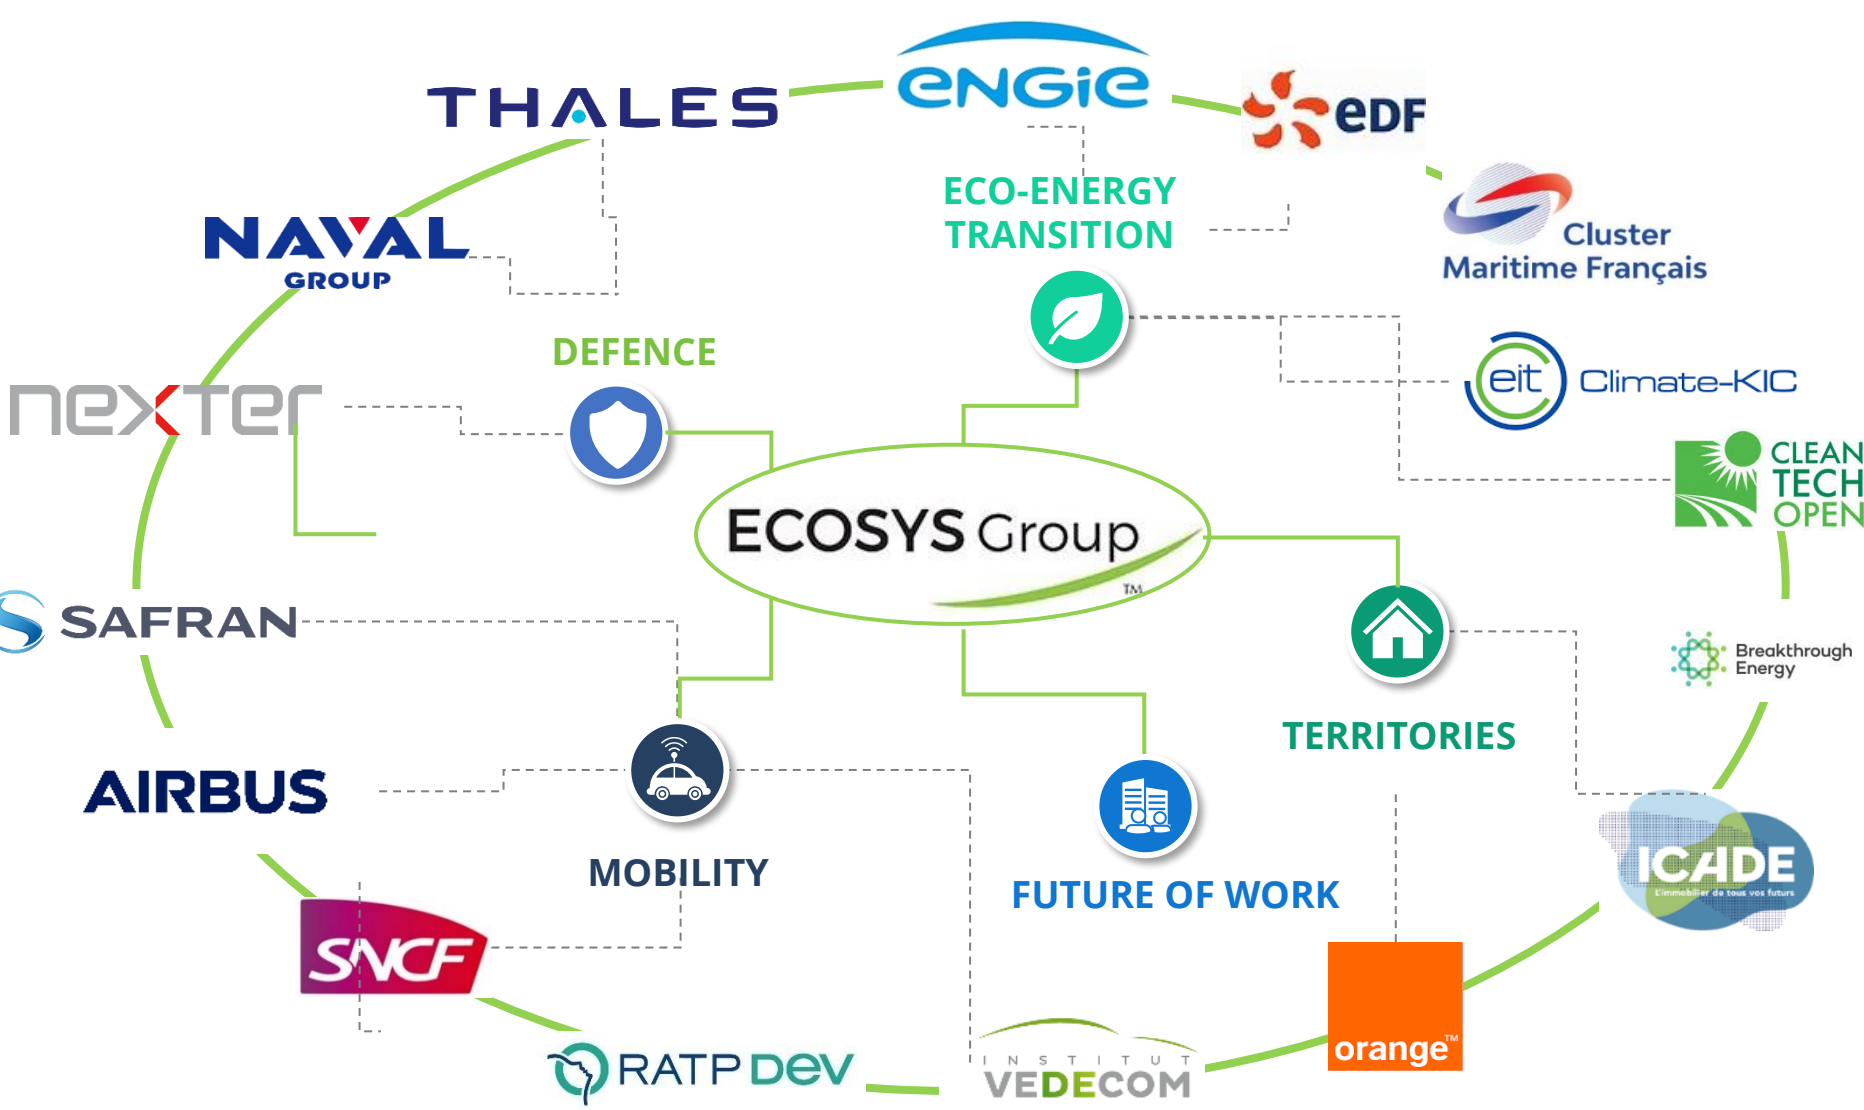

INNOVATION & TRANSFORMATION

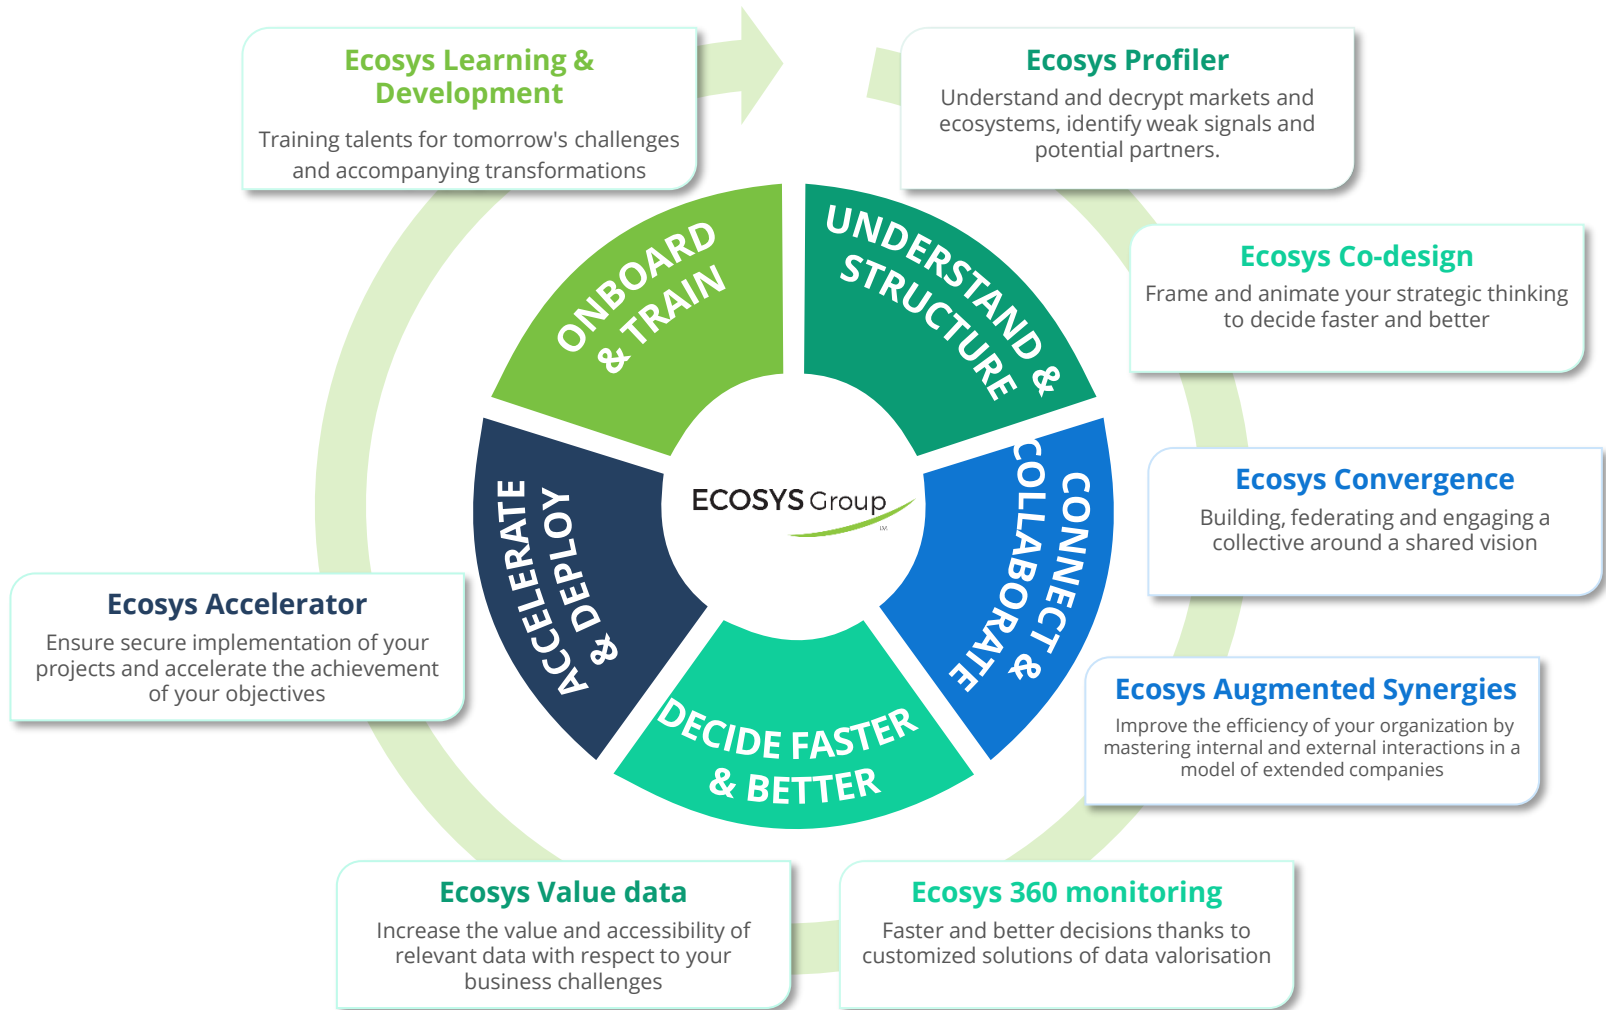

DATA MANAGEMENT

Our main clients and areas of expertise

We adress 5 main needs with specific offers

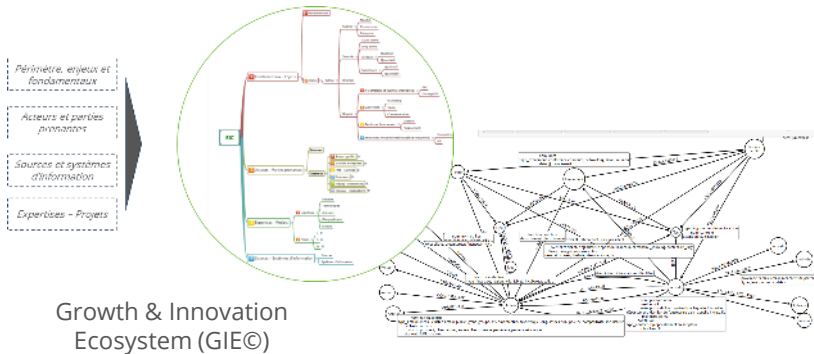

Our methods and tools

4 key stages: Structure – Model – Design - Implement

Structure

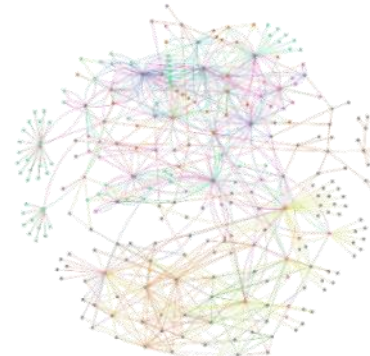

Stepping back via non-linear writing and structuring of the Conceptual Data Model (CDM)

Conceptual Data Model (CDM)

Model

Modeling of the ecosystem to build a Digital Twin and facilitate decision-making

Nurturing of the conceptual data model and creation of the associated graph

Strategic analysis of the graph, formalization of the diagnosis and recommendations

Design

Design of "monitoring cockpits" or data management systems / platforms

Monitoring dashboards

Implement

Training and deployment
