

# BUILD YOUR IOT APPS BETTER & FASTER

**Kuzzle is an open-source solution that includes a scalable server, a multiprotocol API, an administration console and a set of plugins that provide advanced functionalities like real-time pub/sub, blazing fast search and geofencing.**

---

### **REAL-TIME PUB/SUB**

Build event-driven apps with our powerful real-time pub/sub query language. Ideal for data synchronization, messaging, notifications, geofencing, analytics probes, IoT orchestration and more.

### **OPEN-SOURCE**

At Kuzzle we are strong believers in community, transparency, technical excellence & innovation. That is why we made Kuzzle Open-Source and actively contribute to, and depend on, this ecosystem.

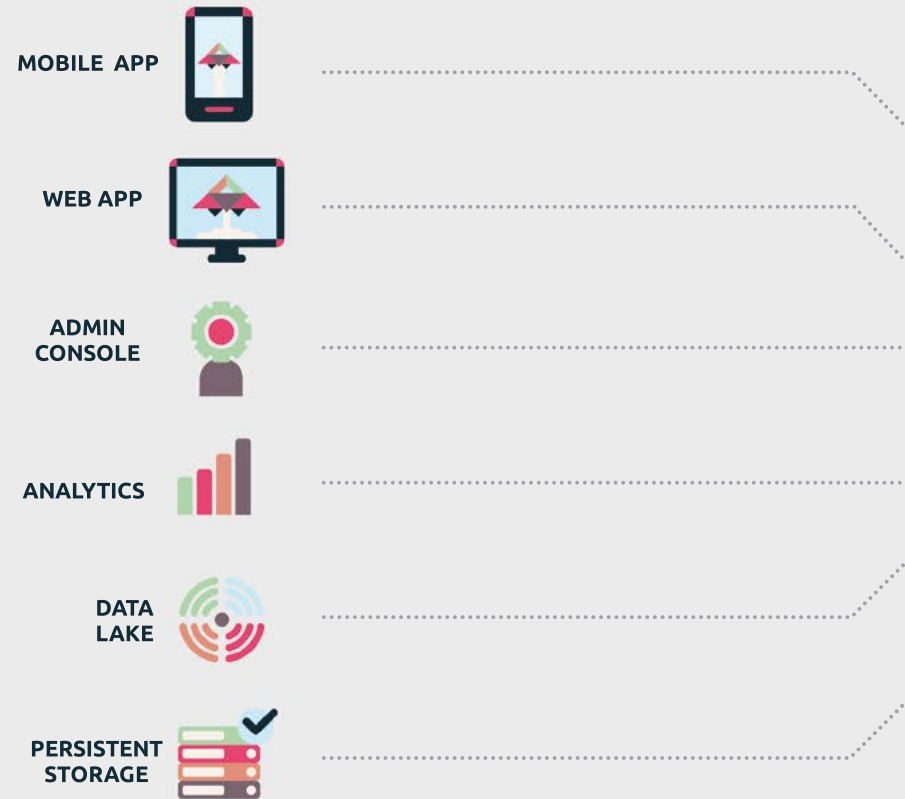

### **ON-PREMISES**

Kuzzle can be deployed on-premises and can scale horizontally on any cloud service, intranet, IoT hardware or on your existing Linux or Docker infrastructure.

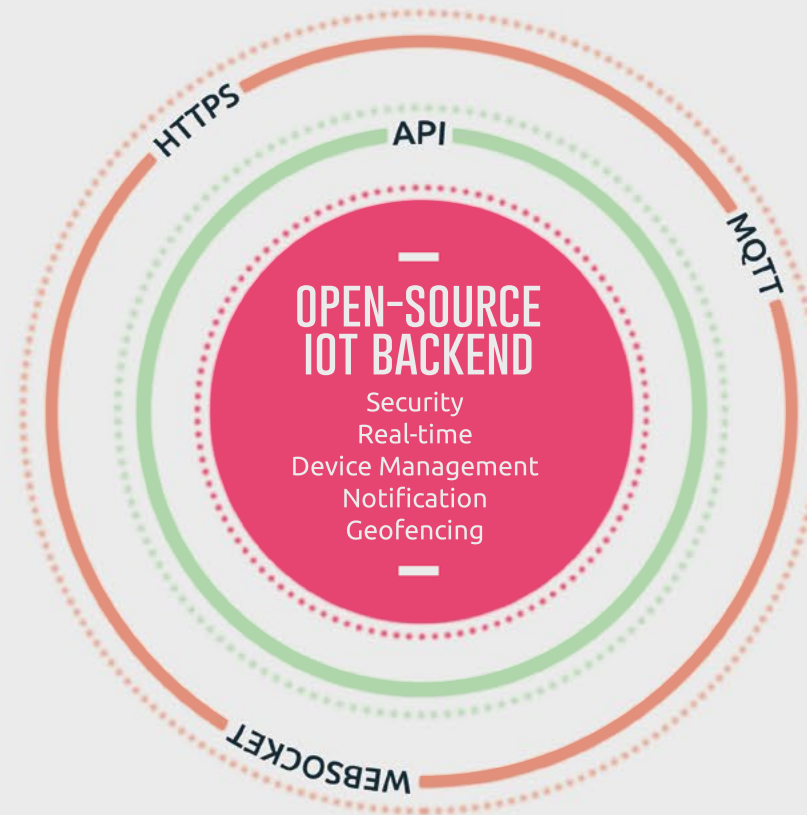

# MANAGE YOUR IOT DEVICES

Kuzzle provides ready-to-use IoT features to manage your devices

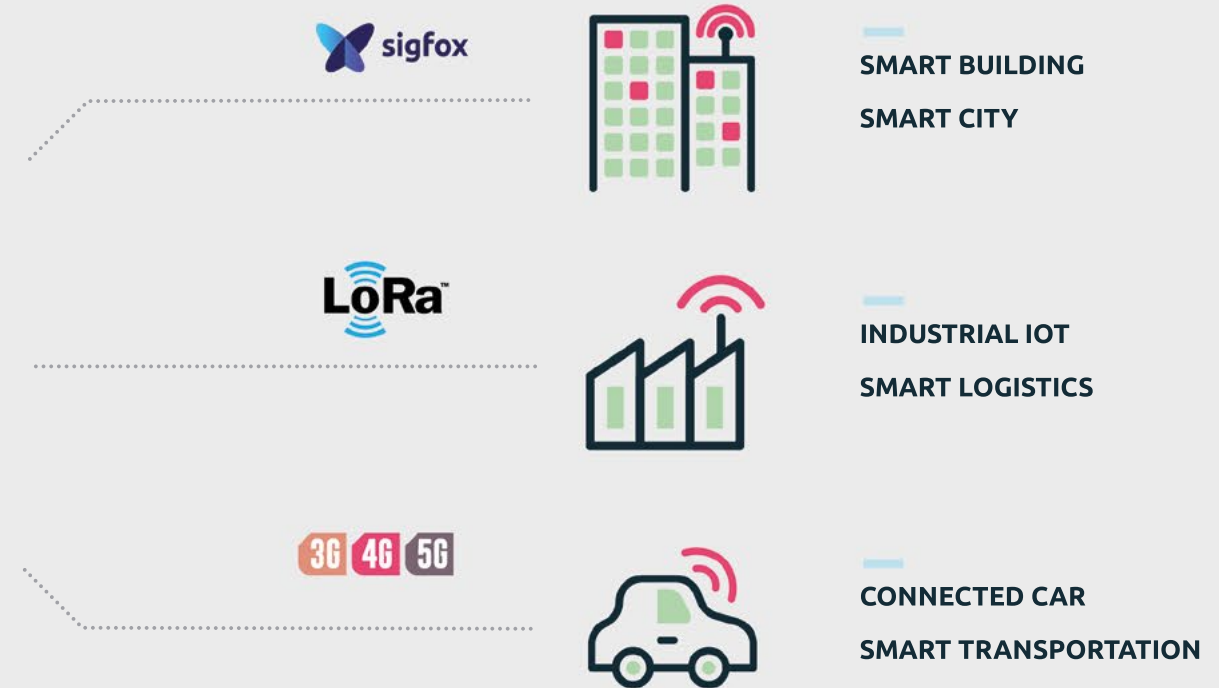

# BUILD YOUR IOT APPS BETTER & FASTER

Kuzzle gives you high control as an open-source portable backend that can be adapted to meet your project requirements and high productivity as a quality assured feature-rich solution that includes versatile SDKs and is readily scalable.

# CONNECT YOUR IOT DEVICES

Kuzzle provides SDK to develop your firmware and connect your devices

## ON-PREMISE OR ON PRIVATE MANAGED CLOUD

## THEY TRUST US

## KUZZLE SDK

# OUR VALUE PROPOSITION

**ACCELERATE INNOVATION**  
(WEEKS VS MONTHS)

**SEAMLESS**  
USER EXPERIENCE

**REDUCE TIME**  
TO MARKET (UP TO 40 %)

**SECURE IOT**  
AND USER DATA

**INCREASE**  
ROI

**FUTURE PROOF**  
INVESTMENT
