ABOUT US

Trustpair helps Financial departments of Mid-Cap and Major groups verify their third parties bank details and control their data throughout their Procure-to-Pay process.

With Trustpair, Financial departments use a single platform to:

- Check third party bank details within minutes when adding/editing data
- Audit their Vendor Master
 File continuously to ensure data quality
- Secure their payments ahead of any financial transaction

Secure third-party data throughout the Procure-to-Pay processes, while adapting to your technical environment.

Wire transfer fraud, what is it about?

It is a fraud technique that involves the identity theft of a third party which leads a company to pay a bank account held by a fraudster, when thinking paying the right supplier.

The key issues of an anti-fraud tool for your financial department:

International coverage

Assessments relevance

Integration with existing business tools

A dedicated support and assistance

Designed for and with the Financial departments of Mid-Cap and major groups, Trustpair meets the most rigorous requirements and allows your financial department to:

- Benefit from **relevant evaluations** with a binary risk evaluation, avoiding false negatives
- Checking bank details in an international environment
- Control third-party data directly through their business tools: ERP, TMS, Procurement software
- All-in-one support to carry out high quality projects that meets their needs

With Trustpair's control methodology, it is no longer just a consistency check that we run but an exact confirmation of the validity of the supplier: fraud risk no longer exists.
