

# WISEAR

More than 200 millions earphones were sold last year, more than ever before. Choosing the right one has never been so hard.

How could one be the chosen one?

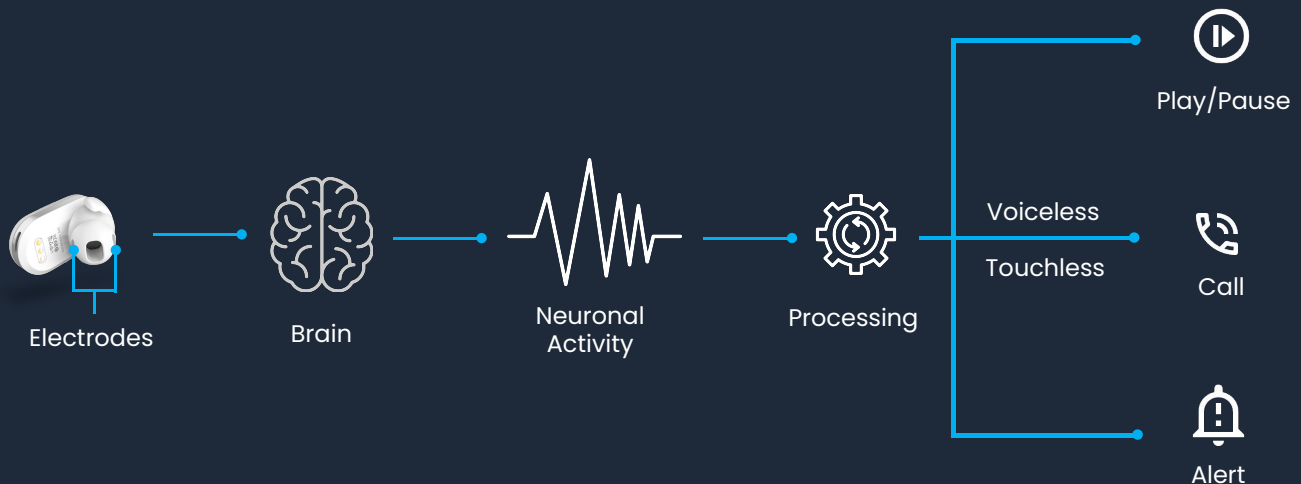

Simply by making earphones that do a lot more than expected and yet do exactly what people want.

**Earphones that let your mind be in control**

## WHAT WE DO

Our technology gives your users **controls** like answering a call or playing the music that are almost **magical** through a **neuronal biosensing solution**, without them having to use their voice or touch

## HOW WE DO IT

**We use tiny electrodes to record your brain & facial activity, and then our patent-pending AI technology transforms these signals into actions.**

## WHY US

We are a **deep-tech** startup with years of expertise in **neurotechnology** and **AI**

Our technology is **robust** enough to be used in **any earphones**

## WE'RE TRUSTED BY

**bpifrance**  
**techstars\_**

**LOOKING FOR YOUR NEXT KILLING FEATURE?  
LET'S MEET.**
