IoT

Transform environmental data into action

Combined smart data modeling, IoT and perceptions to address environmental challenges

Assess environment anywhere, anytime

Make the invisible visible as a key step to **protect your assets and mitigate risks**. Have a precise overview of the environment in defined location and time span. From monitoring to compliance and alerting, it gives you the means to act around your CSR and QLV priorities.

Engage communities & stakeholders

Harness communities' feedbacks through a unique and agile SaaS platform and in-app solutions, **understand how the environment will impact health and well-being**. An untapped approach to set preventive plans while insuring proper return on investments.

ANALYSE & EXPLAIN

- ✓ Area & site geotemporal comparison
- ✓ Environmental modeling and simulation
- ✓ Source identification
- ✓ Mastering EHS compliance

ACT & PREVENT

- ✓ Populational report & exposure insight
- ✓ Prevention plans simulation
- ✓ Health tips
- ✓ Alerting

ANALYSE & EXPLAIN

- ✓ Communities' interactions consolidation
- ✓ Perceptions Vs Environmental data
- ✓ Long term health follow-up
- ✓ Communities report and exposure insight

ACT & PREVENT

- ✓ Healthy routes recommandations
- ✓ Individual prevention
- ✓ Simulated prevention
- ✓ Personalized alerting
