

# Multi-cloud modelling and monitoring

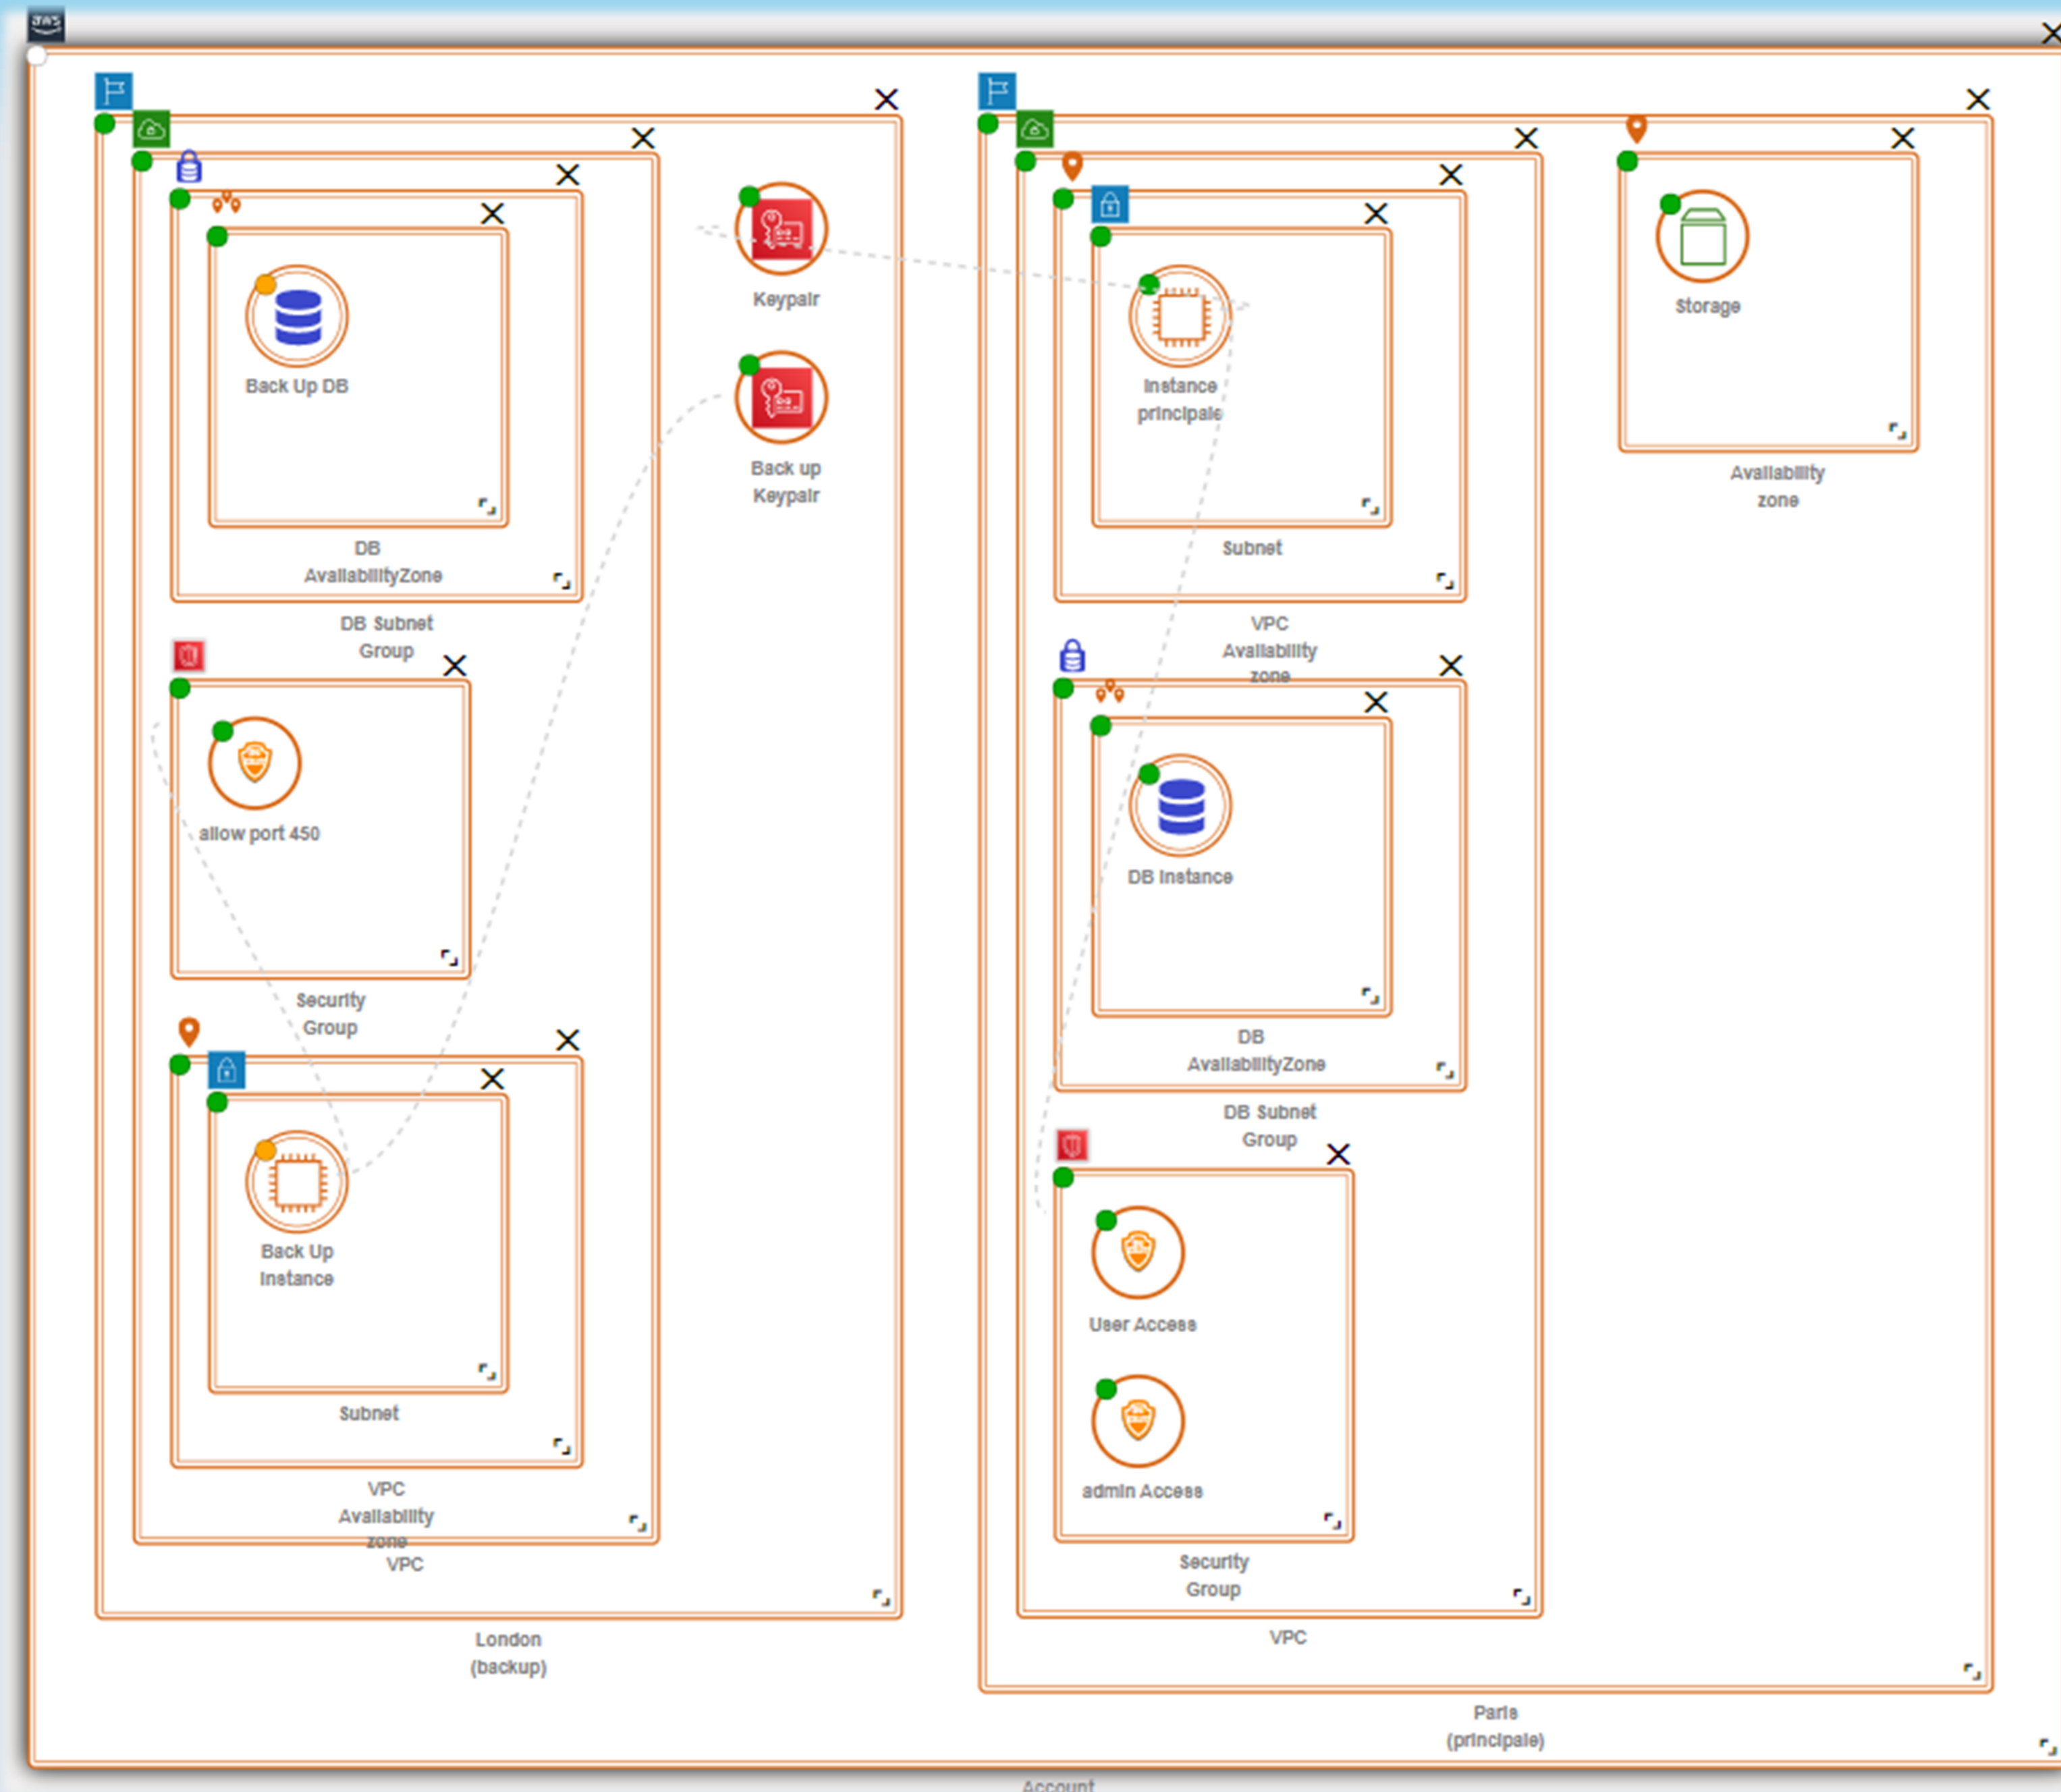

Xscalibur: one software to rule them all

# About us

- Innovative start-up created in 2019
- Cutting edge technology rooted in scientific research at the INRIA (French national institute for research in digital science and technology)

*Our vision: decomplexify cloud computing and enable an eco-responsible digital usage*

# Xscalibur Cloud Studio

*Mono and multi-cloud*

*Automatic mapping of your XaaS services*

*Easy and guided design of your cloud architecture on demand*

*Automatic rebuilt of the existing environment*

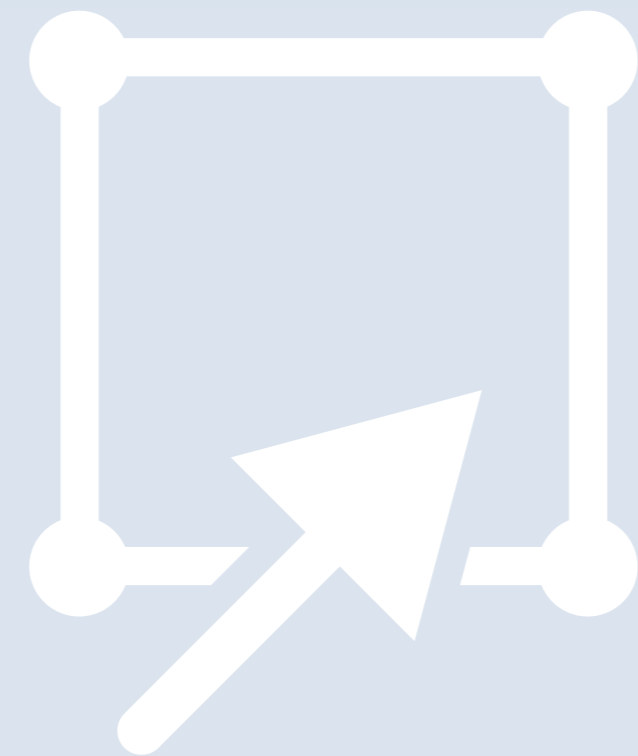

*Status of your cloud resources in real time*

*Automated deployments and documentation*

# Key features

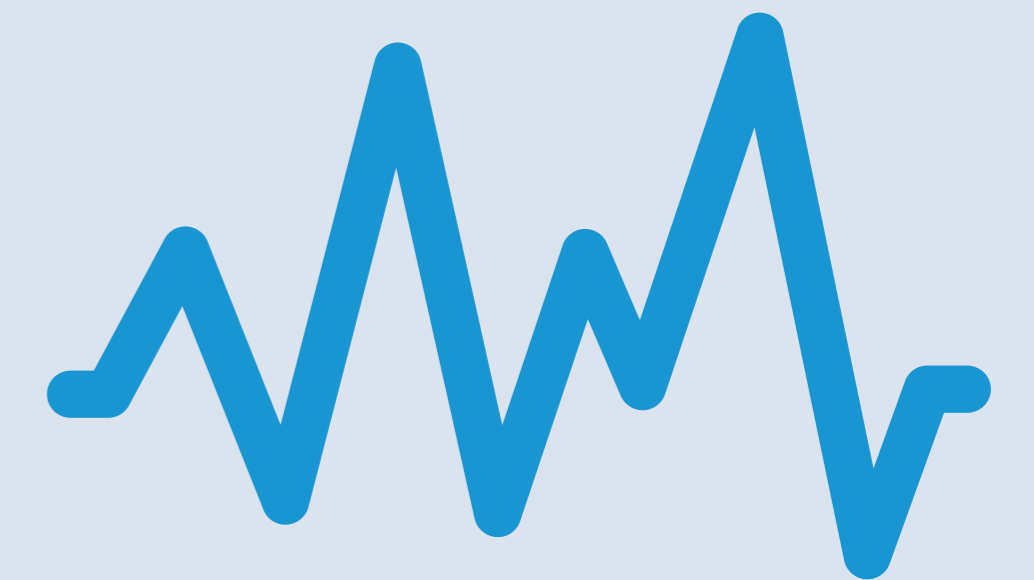

*Visual design of cloud architectures and environments*

*Built-in service constraints to only create functional architectures*

*Automated deployment of cloud architectures*

*Real-time monitoring of the status of your cloud resources*

*Give your teams the means to support the business, improve productivity and optimize ROI of projects*

# Digital eco-responsibility at the heart of our vision

*Energy consumption of each  
element of the ecosystem  
-> carbon footprint*

*Infrastructure location  
-> energy profile*

*Asset utilization  
-> over-capacity & wastage*

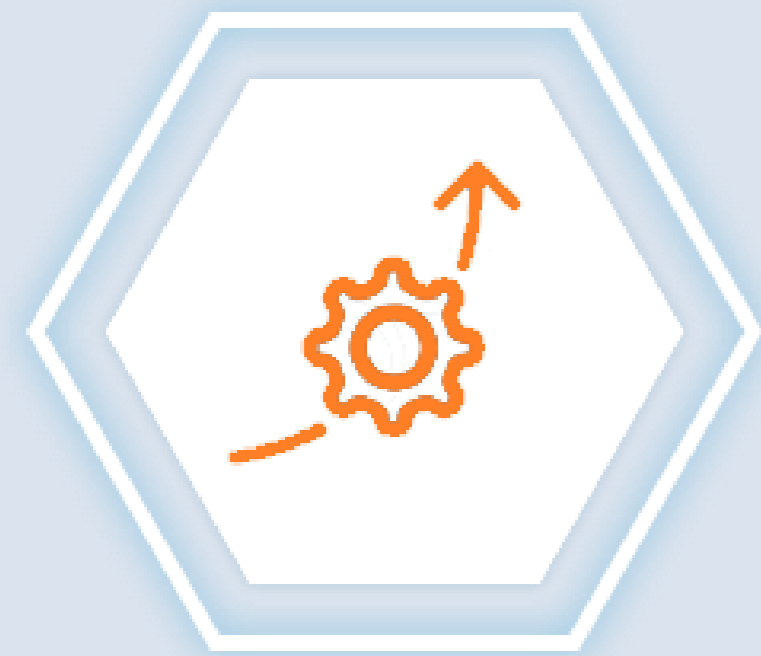

*Data flows  
-> utilization, duplications*

*Business applications  
-> efficiency*

*Enabling businesses make eco-responsible choices*

# ROI

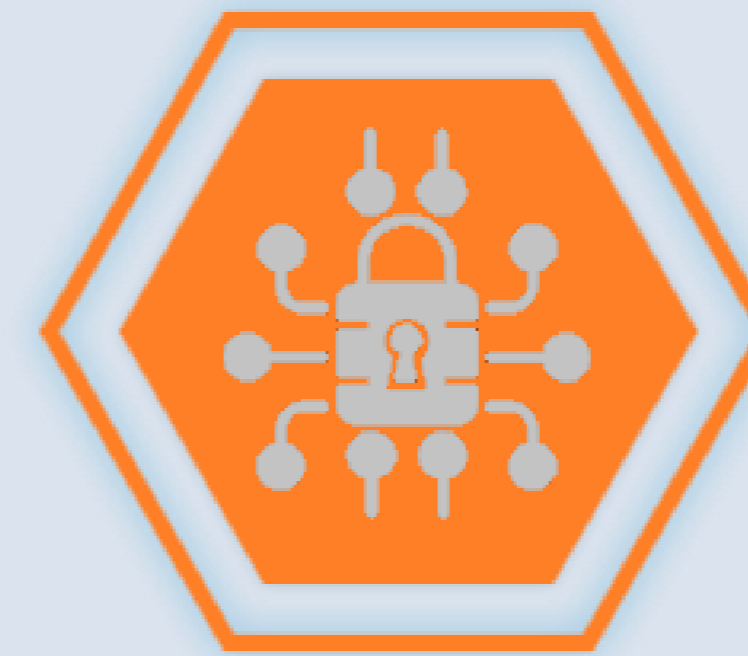

## **Productivity**

*Automatic updates*  
*Over 30% gains in time and resources for your deployments*  
*Operational costs under control*

## **Agility**

*Facilitated collaboration between teams*  
*A simplified and quicker implementation*  
*Easy access to multi-cloud strategies*

## **Security**

*No reason for teams to create their "shadow IT"*  
*Homogeneous deployments from templates*  
*Management of users rights and history of actions*

## **Team development**

*An efficient and practical way to develop your teams*  
*Expedited onboarding of new team members into existing projects*  
*An environment to test new services without any risk*

*A higher performance to better serve the business*
