# AUGMENTED MEDICAL WRITER

Streamline complex medical reporting, with accurate automated analysis

## Scale human expertise with NLG tools for medical report writing

Automate report writing, translating data into accurate and actionable language; making specialist medical reports faster to produce, accurately and consistently, enabling you to get drugs to market faster.

### Reduce costs

Automatically generate data driven reports, saving time, resources and money.

### Ensure compliance-proof reporting

Remove the risks of manual, human errors in reporting, ensuring high-quality, accuracy and full traceability every time.
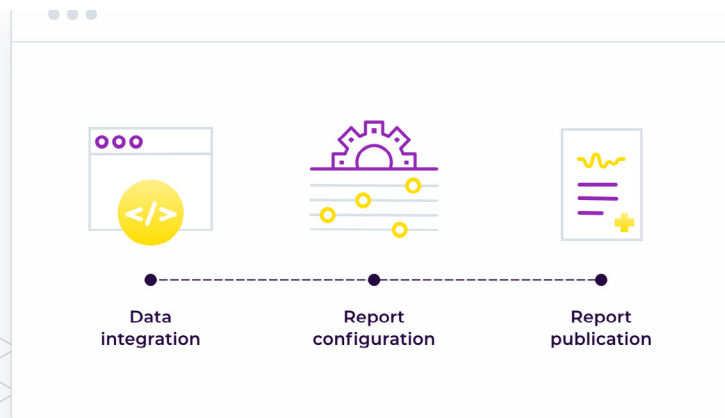

### Empower analysts

Enable your team to focus on more valuable and strategic work, empowering them with more insights to drive better decision making.

### Accelerate regulatory submission

Streamline processes and produce reports faster, increasing operational efficiency.

**Applications to streamline and accelerate your regulatory submissions**

Augmented Medical Writer is built for enterprise-level deployment, facilitating the generation of large volumes of complex medical reports upon request by large analyst teams. Find out more about our suite of pre-packaged tools for specialist reports.

**CLINICAL STUDY REPORTS (CSRs)**

Automating the writing of CSRs saves significant time, reducing report writing times by an average of 30%. This translates into significant cost savings, enabling your analysts to focus on more valuable drug discovery projects, and ultimately speeding up the process of bringing new, potentially life-saving drugs to market.

Saving +30% time

**PATIENT SAFETY NARRATIVE**

Augmented Medical Writer generates the core elements of your specialist medical reports, enabling your analysts to focus on the most important and valuable elements.

**Yseop, trusted by top financial institutions in the world**

Founded in 2008 and based in North and South America, and Europe, Yseop specializes in artificial intelligence (AI) and is a recognized pioneer in Natural Language Generation (NLG) technology. Yseop is rapidly expanding globally, providing enterprise-level automation solutions for some of the world's largest companies in a variety of industries including finance (Credit Agricole, Factset, BNP Paribas), pharmaceuticals (Sanofi) and computer software (Oracle). Yseop also partners with strategic consulting firms and system integrators, such as CapGemini and LTI, who have successfully integrated the Yseop NLG solution.
