

Our Mission

To provide every human on Earth with instant access to vital medical supplies.

Zipline runs the only nationwide drone delivery networks in the world, powered by the fastest and most reliable long distance delivery drone. Across the United States and around the world, someone gets a Zipline delivery every 4 minutes.

EXPERIENCE

- **8 million miles** of autonomous flight
- **100,000+** successful commercial deliveries
- **500,000+** products delivered
- **25 million** customers serviceable from Zipline distribution centers
- **20 drone hubs** completed or under contract in USA, India, Ghana, Rwanda and Nigeria

DECENTRALIZED CARE, DELIVERED

Care delivery is pivoting back toward a more patient-centric and decentralized model, but today's healthcare supply chains are not compatible.

Zipline delivers products faster and at a lower cost than the closest ground based alternatives, enabling true decentralized care by delivering what is needed, when its needed - whether to the ambulatory facility, or directly to the patient's home.

If your care is patient-centered, shouldn't your logistics be too?

"The COVID-19 pandemic has tasked us with being even more nimble and innovative in how we solve complex challenges. Fast-tracking our medical drone transport capability is just one example of how we're pioneering in the health care industry"

IMPROVE OUTCOMES

Boost telehealth

Increase home care and telehealth, avoiding costly visits to ED or urgent care. \$169 saving per virtual visit (Nord et al, 2019).

Increase access

Expand the reach of healthcare in rural and underserved communities, improving health access and outcomes.

INCREASE ACCESS

Improve Rx adherence

Give patients down-to-the-minute control over home delivery, increasing adherence by 18% and saving >\$5,200 per patient/year (Cognizant, 2020).

Improve patient experience

Patients expect personalized and on-demand services. Zipline gives customers control and visibility over their care.

PUTTING ZIPLINE TO USE ACROSS THE US HEALTHCARE SYSTEM

Zipline provides an end-to-end on-demand delivery service that integrates into existing supply chains and care models.

Virtual visits

Enable fully virtual care in the home by delivering diagnostic devices and prescribed medications

Home delivery pharmacy

Eliminate barriers to patients obtaining medication, increasing adherence and access

Ambulatory & acute supply chain

Offer new types of care closer to your patients, from decentralized infusion to speciality pharmaceuticals

THE ZIPLINE DELIVERY EXPERIENCE

On demand delivery with Zipline brings the patient closer than ever before, giving patients control and certainty.

Patient or provider places an order through your existing channels.

Patient elects instant delivery, and chooses a 15-minute delivery window.

Order is fulfilled by your pharmacy, a partner, or Zipline.

Patient tracks the flight in real time and gets an alert prior to delivery.

Patient confirms receipt of the delivery, electronically signing for the delivery.

ZIPLINE KEY STATS

- 50-mile service radius
- 20 minute average delivery time
- Can carry 95% of typical outpatient prescription shipments
- Guaranteed cold chain adherence
