

E-capsule

by minutup

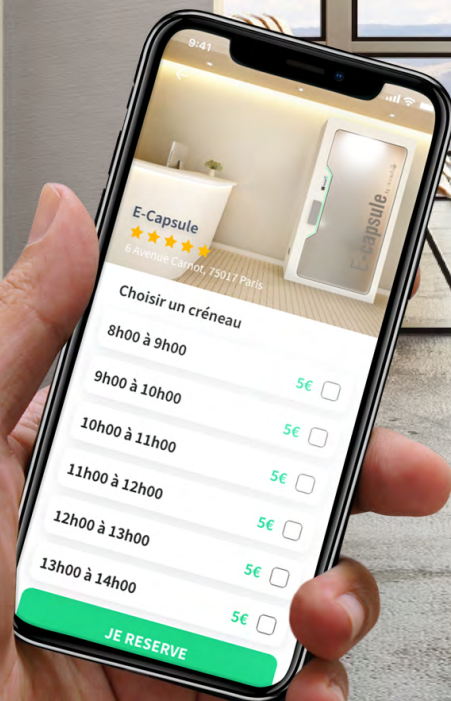

Observation

With the pandemic, population's habits have changed with a **boom in teleworking**. This new way of working is going **to modify the spaces** and environments of companies for the years to come.

Our objective

Provide an answer to the daily use of your clients and teams, **upgrade your spaces** thanks to work and relaxation capsules.

Our solution :

Modular, simple and connected, our E-capsule by minutup makes it possible to recreate a suitable work environment. It is specially designed to meet the new expectations of workers.

Combine open and individual spaces to optimize spaces.

Modular:

Set up the capsule on 1.5 sqm

Equipment:

Enjoy a 22" screen to make your video conferences in a quiet and discreet place.

Soundproof and sanitized :

Improve the efficiency of your teams in a quiet and protected place thanks to our Protect Ecran® antimicrobial films.

Assets

Geolocated:

Users can search for nearby workspaces.

Simple and flexible booking:

Users book an E-capsule by the hour or the day via our website (www.minutup.com) or mobile application.

Safe and Covid-19 resistant:

Users enjoy peace of mind thanks to a secure access, surfaces protected by a virucidal and antimicrobial film and air renewal.

Fully equipped:

Users benefit from high-speed Wi-Fi, complete soundproofing and other multimedia services.

Can be monetized:

Make your square meter profitable and create additional revenues thanks to reservations generated by the E-Capsule.

Work as a Service:

Upgrade your business clients by giving them privileged access.

Technical specifications

Capacity:

1 person

Weight:

310 kg

Connectivity:

1 standard 230V socket - 2 USB - Wifi

Structure:

Recycled wood

Door:

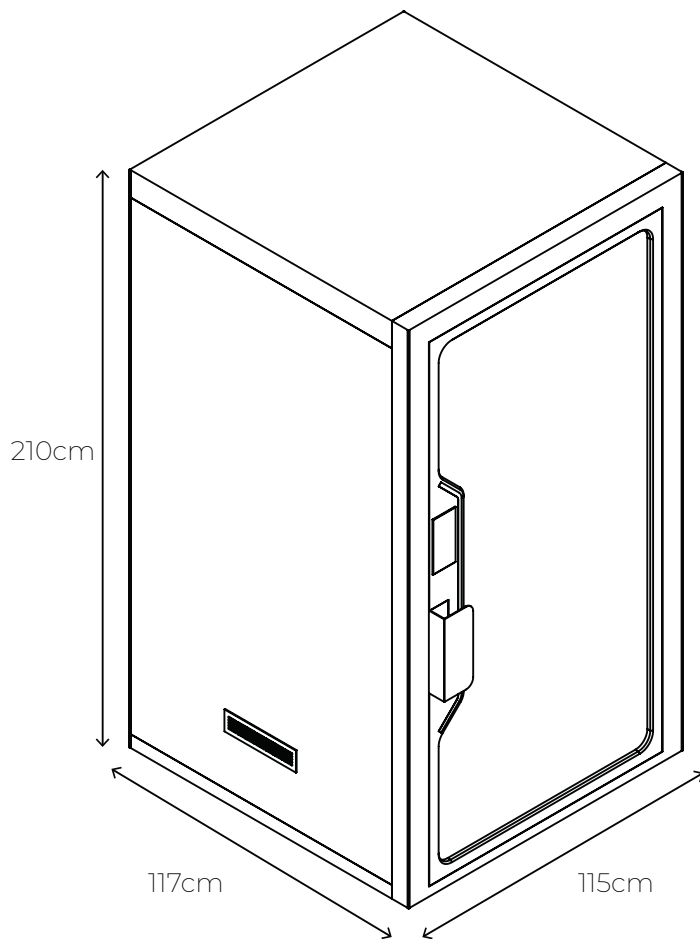

Phonic glass

Ventilation:

Débit d'air : 240 m³/h

Soundproofing:

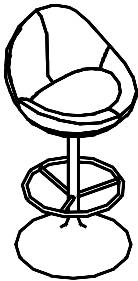

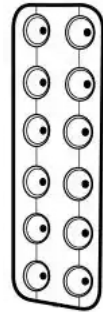

- 40 dB (recycled material)

Options

Air purifier:

It effectively fights against particles, allergens and bacteria from the air inside the E-Capsule. Our ionizers are 100% designed and manufactured in France, with no planned obsolescence. The efficiency and harmlessness of the devices are verified by Intertek and Certam independent laboratories.

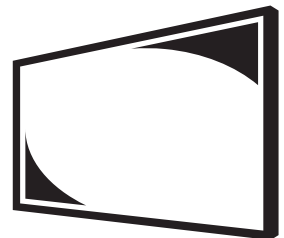

Seat:

We have selected a seat which perfectly matches our criteria to bring you all the comfort you need to work.

Screen:

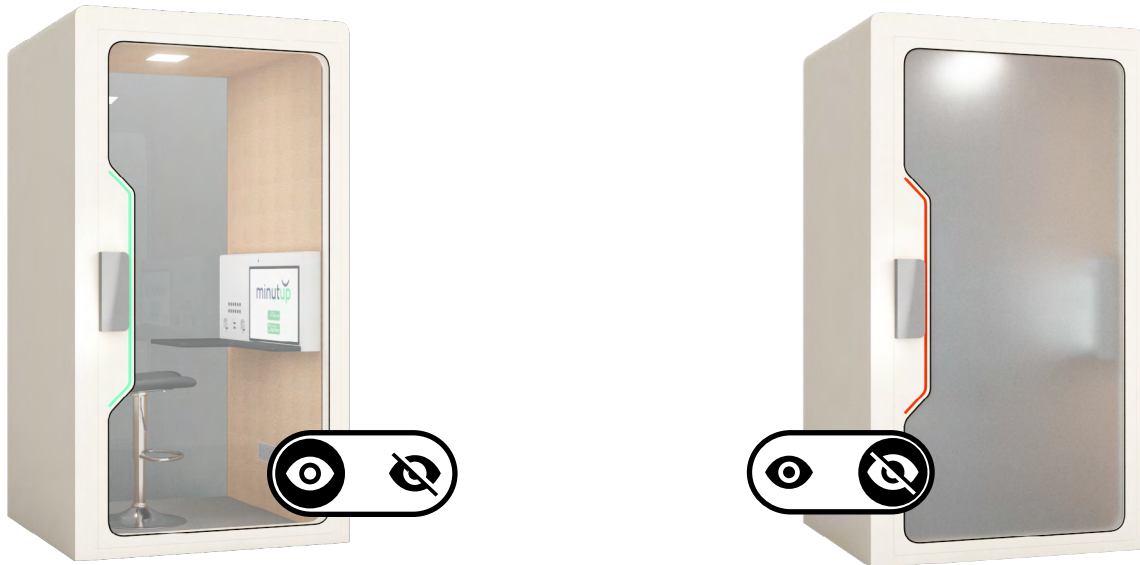

Enjoy a screen directly integrated into the E-Capsule to increase your productivity. Use it as a second screen or mirror screen for your computer.

Innovation

Automatic opacity glass:

First soundproof cabin to benefit from this technology. Glass surfaces get opaque to ensure confidentiality in your work during your reservation. There is still enough light to keep in touch with the outside world!

- Switch from transparent to frosted and frosted to transparent, in the blink of an eye.
- Preserve your privacy and keep transparency glazing, according to your needs.
- Let in as much natural light as possible.
- Solution with low-energy consumption, reliable over time and which does not require specific maintenance.

- 2-year warranty
- Connected lock
- Booking possible via minutup.com
- Remote management interface
- **Equipment maintenance**
- **Wi-Fi hotspot***

*with hardware option.

A very low ecological impact

For us, wood, a noble material par excellence, is much more than a raw material. It symbolizes the firm will for our company to integrate a reasoned and sustainable development approach. The structure of our capsule consists of panels made from recycled wood.

Our acoustic insulation comes from the collection, sorting and recovery of clothes, thanks to the work of 1,200 people from Le Relay association.

Made of 85% recycled cotton, it is 100% recyclable, with M1 fire and A+ capsule ambient air classifications.

We are committed to offsetting the carbon impact of our capsule's manufacturing, by investing part of the price of the capsule in tree planting.

1 E-capsule = 10 planted trees
