## PAck Quantique

Since late 2020, the Paris Regional Council decided to support market access of Quantum technologies with a generous grant for startups. The PAck Quantique supports startups and end-users in launching experimental application.

The Paris Regional Council is providing 1.5 million euros over 3 years to support actors downstream of the value chain, technology developers (hardware and software) and end users.

A public company whose mission is to develop the use of High-Performance Computing (HPC) for the competitiveness of the French economy, in all scientific and industrial fields.

Le Lab Quantique is a Paris-based Think Tank and a network of bottom-up initiatives to foster synergies within the quantum community.

**PAQ is a fast-track initiative for quantum computing which has already supported 3 projects.**

### AQUARE

Associating Pasqal and giant utility EDF on smart mobility and the **optimization** of the recharging of an e-vehicle fleet.

### AQCMED

Associating Qubit Pharmaceuticals and Pasqal on **drug discovery** and accelerated computational drug design workflows in hybrid HPC / QC architectures.

### AQMUSE

Associating the French branch of US based QCWare and energy company Total to address common **pooling issues** in logistics.
