

TROOPER

The autonomous spacing robot for
greenhouses and plant nurseries.

Our company

INSTAR Robotics designs autonomous robots that are smart, reactive and based on artificial neural networks. Those robots focus on useful tasks and allow people to stay focus on their core job.

Our product

We address the need for workforce linked with repetitive and painful jobs in the agricultural sector. Thus, we introduce **Trooper**, the autonomous spacing robot, able to achieve all common plant handling operations : **spacing**, **consolidating** and **production bed moving**.

TROOPER

The autonomous plant spacing robot.

100% Electrical
Silent & non polluting

100% Autonomous
Artificial Intelligence
Reactive & adaptative

Adapted to nurseries
Robust, compact (60kg, 70x60cm)
Prevent floor damage.
Weather-proof

Reliable
Constant working quality
High reproducibility.

Cobotics
Natural interaction
Sharing workspace with human

Continuous operation
Working 24h/24, all days
with the multi-batteries pack

** Non contractual document. Offer subject to conditions.
