

PrimeHub

Makes AI Workflow 10x Faster

An enterprise-grade AI/ML platform designed for multiple AI projects. Start your model training, management and deployment easily in a single click with MLOps workflow and boost your model time-to-market!

Effortless Model Deployment and Real-time Monitoring

- Model Packaging Suggestions
- APIs for CI/CD automated deployment
- Rolling model update and visualized real-time monitoring

One-click Research Environments

- Develop interactively with Jupyter
- Support various deep learning frameworks
- Visualize training progress

Enterprise-Class Account Management

- Single sign-on (SSO) support
- 2-factor authentication user account protection
- Internal auditing tools

Management of Resource & Quota Privileges

- Personal and shared group folders
- Fine-grained quota allocation for members and groups
- Resource access privileges for groups
