

Press Release

Mazrui Energy and LS Group Sign Strategic Collaboration Framework at ADIPEC 2025

Mazrui Energy, part of Mazrui International and a leading energy solutions provider globally, has signed a strategic collaboration framework with LS Group, a prominent Chinese energy equipment manufacturing conglomerate renowned for its expertise in oil and gas drilling/refining/chemical equipment manufacturing, and clean energy solutions including hydrogen and carbon capture, utilization, and storage (CCUS).

The signing took place during the ADIPEC 2025 exhibition in Abu Dhabi, underscoring both companies' commitment to advancing innovation and sustainability in the global energy sector.

This partnership brings together Mazrui Energy's strong regional presence, engineering capabilities, and customer relationships with LS Group's more than 70 years manufacturing excellence and technological leadership. The collaboration aims to:

- **Localize advanced equipment technologies** to strengthen regional supply chains.
- **Support industrial capability building** across the UAE and GCC.
- **Contribute to the region's energy transition and decarbonization efforts**, aligning with global sustainability goals.

Commenting on the agreement, Danny Fournel, Mazrui Energy Director said:

"This partnership reflects our shared vision for innovation-led growth and long-term value creation. By combining our strengths, we aim to deliver solutions that support the region's evolving energy landscape."

A representative of LS Group said:

"We are excited to work with Mazrui Energy to bring advanced technologies and sustainable practices to the Middle East, fostering mutual growth and Energy Equipment Industry development."

About Mazrui Energy

Mazrui Energy, part of Mazrui International, is a leading energy solutions provider with over five decades of experience. Our portfolio spans **Engineering & Manufacturing of oilfield equipment**, **Inspection, Repair & Services** to ensure asset integrity, and **Petrochemicals**, including drilling fluids, environmental solutions, and specialty chemical manufacturing with toll blending. We also drive **Strategic Ventures** to introduce advanced technologies, support **Clean Energy** through decarbonization and carbon capture, and deliver **Digitalization & AI solutions** that enhance operational efficiency. Through innovation, reliability, and strong partnerships, Mazrui Energy supports customers across the energy value chain and enables sustainable, long-term growth.
